

The Bare Facts About Turbine Bearings

Only the finest quality American-made bearings are used in Lomanco's Whirlybird™. Other turbines may skimp on bearing quality, but at Lomanco, we know that bearings are the heart of the turbine. If they're out of round, poorly sealed or made with inferior materials, they simply won't last or run as quietly as the Lomanco WhirlyBird™.

Compare. And you'll see the difference. And you'll see why Lomanco lasts forever. Guaranteed.

Design Feature	Lomanco	Competitors
Delrin® bearing rings	Yes	No
Made completely in the USA	Yes	No
200 Grade 302 series stainless steel balls	Yes	No
Concentric to .0015	Yes	No
Fully machined raceways	Yes	No
Turcon® permanent seals	Yes	No
Self-lubricated Turcite® bearing cage	Yes	No
Ultrasonically welded bearing cap	Yes	No
