

Once Lomanco's Whirlybird™ is Installed, You can Forget About it. Forever.

Simply put, you can't sell a better turbine than Lomanco's Whirlybird. Because it's built to last indefinitely. And once it's installed, you can forget about it. Because we guarantee it forever.

When you see how we build WhirlyBird, you'll see why we have the confidence to stand behind our product like we do.

American-made polymer ball bearings for silent operation and NO maintenance. Every WhirlyBird™ is factory tested to turn in a breeze of less than two miles per hour.

21 Air-foil curves blades riveted to hubs

Rigid spider-type construction _ riveted at every connection and tested to withstand 120 mph.

100% Rust-free all -aluminun constructin - available in mill finish, brown, black or white.
