TrimCutter™

We've Made The Cut Once Again!

Following the successful introduction of QuickScore™, we are pleased to introduce TrimCutter™ for slitting galvanized steel, copper, zinc, vinyl and heavier aluminum right on your brake. Designed to make your job site life a little easier while saving you time and money, TrimCutter™ leaves a clean burr-free factory edge every time and will pay for itself in just one job. Ask your distributor for details on this exciting new tool from your silent partners at Van Mark.

Low profile grip area gives superior control thru cut!

Unique 4-point track bearing system, combined with a low profile grip, provide unprecedented control over tool during cut and positively will not ride off the brake like other cutters.

Model 3017

Slit materials down to size fast and easy without worry. TrimCutter™ produces clean burr-free factory edges every time.

Effortlessly cut materials down to size!

- Knives made from 100% hardened tool steel.
- Tool uses 4 point roll bearing track system.
- Use with Mark I and Mark IV series brakes.
